Geo. H. Clark, Local Agent, Daytona, Fla.

## SHORT STORIES.

Government serves a Wisconsin who numbers more than 100,000 who will have to pay railroad fare to their home to vote for or against.

The couple of the Senator's wife are going to move to New York, and are leaving second and third-class passengers. This couple is the subject of a story in the news of the moment. The new Chamber of Commerce may be interested in the result of the case. This is about 1,500 feet long and we will see it sometime this year.

Dr. William Indian, now 70 years old, has been making his reputation among the Indians as a medical man. He is a native of Louisiana. He says he finds the Indians will work in farms or on ranches, while others than those who are paid to do so, are lazy. In China, he has found the Chinese to be the best and the most intelligent people he has ever seen. He says the Chinese are very good workers.

Twenty years ago Dr. Indian was a boy in China, and he learned the principles of the Chinese agricultural organization. He sends me a special report for the paper, which gives an account of the various farm and ranches he has examined. It is remarkable and interesting.

He says the Chinese are the best and the most intelligent people he has ever seen. He says the Chinese are very good workers.

## BLIND MAN'S BUFF.

The Common Game is of Great American and French origin.

"Blind man's buff" is a French game and is very popular among the children of England and the United States. The French name is "l'aveugle au poing," which means "blindfolded fist." It is a game in which the players close their eyes and try to catch each other.

In the game the blindfolded player is led by his friends to a certain spot in the room, and then the other players close their eyes and try to catch him.

When the blindfolded player is led to the spot, the other players close their eyes and try to catch him.

When the blindfolded player is led to the spot, the other players close their eyes and try to catch him.

## DISEASES OF CITRUS TREES

B. F. Floyd, of the Florida Agricultural Experiment Station, writes at Citrus Die-Back.

Die-back is one of the common diseases of citrus trees occurring in groves where the trees have been weakened by improper treatment or by natural causes. It rarely is exempt from this disease and any variety of citrus fruit-tree may be infected by it. The damage it causes in a grove is usually small, but throughout the state the
